PAN CONNECTORS

Technology from UK

To connect toilets with horizontal and Vertical outlets to standard SWR pipework, Ashirvad has introduced a range of products that are plumber friendly in nature, made of flexible plastic, the connectors tolerate movement, are leak proof (with multiple fins) and can connect different pipe materials.

Specifications for Pan Connectors

- Flexible and made in plastic
- WC load bearing
- Secure fit on WC side
- Connects different materials
- Multiple fins to ensure water tight fit on SWR side
- Individually packed
- With Lubricant

12.5 x 11.0 cm

The flexible connector (APCC2) is extendable from 22.5 to 55.0 cm and is very useful when the SWR pipework is at a significant distance from the WC spigot outlet or if it is in a vertical position.

12.5 x 11.0 cm

The straight connector (APCS2) is used when the spigot outlet on the WC is in line with the SWR pipework system.

12.5 x 11.0 cm

The two ranges of offset connectors (APCO2 and APCO4) are useful if there is a mismatch between the centres of the spigot on the WC and the SWR pipework. Offsets of up to 4.0 cm can be catered to, by these two WC pan connectors.

STUDOR

Active Drainage Ventilation System

Studor P.A.P.A. (Positive Air Pressure Attenuator) and Studor Air Admittance Valves (AAVs) provide a complete Active Drainage Ventilation solution, which is particularly suited to high – rise applications.

An active ventilated system provides relief at the Point Of Need (PON) by removing or attenuating an incoming pressure transient that, if left, could lead to trap depletion.

The combination of the P.A.P.A., Maxi – Vent and Mini – Vent AAVs support a complete system to limit pressure fluctuations, guaranteeing the integrity of the traps.
